work history

noteworthy projects

www.cellebritelearningcenter.com

I led the effort to create a customized, Moodle-powered LMS filled with seventeen+ hours of beautiful, interactive web-based training for which I also provided all narration. I also designed the new certification shields for the Cellebrite Forensic Training System.

US Coast Guard Student Pilot Assessment

I identified a major need in how students were being assessed in the Coast Guard's aviation community and, after many drafts created with the client, implemented a series of interactive .PDF forms that made instructors' jobs easier: they were able to assess student performance more accurately and efficiently. I then taught others how to create and use these forms. These forms are now in widespread use throughout the CG aviation community.

"EJ's work is excellent. He is very open to new ideas and continually makes the extra effort (research, self-education, etc.) to make each product the best it can be!"
- LCDR Rob Potter, USCG

summary

I give everything I have to everything I do because I love learning and growing - and I love helping others do the same. It is for this reason I define education as the art of drawing out one's best.

I am adept at learning complex systems and teaching others to do the same.

"One of EJ's many skills is a talent for gathering and organizing data. His ability to provide detailed, organized, relevant information adds value in the analysis and ultimate final product of any project. During a recent project, I found his work to be foundational to the entire effort, in addition to becoming a springboard of ideas from which the project team could collaborate."

- Art Smith, Instructional Systems Specialist

education

Secondary English Education 2005-2008

bachelor of arts
university of north florida

Instructional Design and Development 2010-2012

master of science
university of south alabama

special skills

Advanced e-Learning? Let's make some with Articulate Storyline, Captivate, Lectora, and more.

I like to sing. And I do narration.

I make and edit photos, videos, animations, and graphics.

I lead by example, by continually building a shared vision, and by identifying and meeting needs.
